

Uses for Horticultural Vinegar

20% acidic

Weed destruction: Use 1 to 2 parts Vinegar to 1 part water for bindweed, grass, etc.

Use straight vinegar for white top, thistles and more tenacious weeds.

1-3 applications may be needed. String-trim the leaf matter to minimum, saturate with spray on the whole plant. Do this during the hottest part of the day.

Worming livestock: Use approximately 1 full gallon to 150 gallon of water. Adjust it stronger or weaker so the animals will drink it. Give to them for 3 days before a full moon as this is when the parasites detach from the walls of the intestines.
